

Highlight Reel

In this project, students will work independently to create a 1-3min highlight reel that can air on WAVE TV, be shown on the school VBRICK system, or posted on our school website. Mrs. MarkAnthony will select the best composition for broadcast.

After completing this project, students will be able to:

- Understand the purpose of editing down lengthy video footage to create a entertaining visually compelling composition.
- Reinforce positive behavior – (VideoI students who filmed this after school event with our new mobile studio - 4 camera video switcher, audio mixer, and digital video recorder).
- Use video as a format to communicate effectively and to raise awareness about one of DHS's extra curricular programs.
- Demonstrate creative thinking and problem-solving skills.
- Work independently and multitask. (Students still have extra curricular filming and editing, papers, and PSA projects)

Demonstrate a mastery of...

1. Pre Visualization
2. Intermediate Editing
3. Transitions, Voice Over, Audio Engineering
4. Rendering
5. Creative Problem Solving
