STUDENT USE OF THE DISTRICT'S COMPUTER SYSTEMS
AND ELECTRONIC COMMUNICATIONS

Computers, computer networks, electronic devices, Internet access, and e-mail are effective and important technological resources. The Board of Education provides computers, a computer network, including Internet access and an e-mail system, as well as other electronic devices that access the network such as wireless and/or portable electronic hand-held equipment that can be used for word processing, wireless Internet access, image capture and recording, sound recording, information transmitting and/or receiving, storing etc. (including, but not limited to, laptops, Kindles, radios, I-Pads or other tablet computers), referred to collectively as "the computer systems", in order to enhance both the educational opportunities for our students and the business operations of the district.

These computer systems are business and educational tools. As such, they are made available to students in the district for education- related uses. The Administration shall develop regulations setting forth procedures to be used by the Administration in an effort to ensure that such computer systems are used by students solely for education- related purposes. The Board will educate minor students about appropriate online behavior, including interacting with other individuals on social networking websites and in chat rooms and cyber-bullying awareness and response. Additionally, the Board will implement a technology protection measure to block or filter Internet access to visual depictions that contain obscene material, contain child pornography, or are harmful to minors and ensure that such filtering technology is operative during computer use by minor students.

As the owner of the computer systems, the Board reserves the right to monitor the use of the district's computers and computer systems.

STUDENT USE OF THE DISTRICT'S COMPUTER SYSTEMS
AND ELECTRONIC COMMUNICATIONS
(Administrative Regulations)

Introduction

The Darien Board of Education provides its students and staff access to a multitude of technology resources for educational purposes. These resources provide opportunities to enhance learning and improve communication within our community and with the global community beyond our campus. The advantages of having access to these resources are far greater than any potential downside. However, with the privilege of access is the responsibility of students, teachers, staff and the public to exercise appropriate personal responsibility in their use of these resources. These Administrative Regulations are intended to promote the most effective, safe, productive, and instructionally sound uses of networked information and communication tools to support 21st century learning in our schools.

The Board and the Administration value freedom of expression and an open exchange of ideas and information. The Board provides students with access to a wide range of information and electronic services, including the use of computers, computer networks (i.e. the Internet), access to a public wifi network, and electronic communication (i.e. electronic mail, telephone). These computer systems are expensive to purchase, install and maintain. As the property of the district these computer systems must be carefully handled and their integrity preserved for the benefit of all. Therefore, *access to the computer systems is a privilege, and not a right*. Students will be required to adhere to a set of policies and procedures, as set forth in detail below. Violations may lead to withdrawal of the access privilege and/or disciplinary measures in accordance with the Board's student discipline policy.

All such information files shall be and remain the property of the District and no user shall have any expectation of privacy regarding such materials or when using the District network. The District reserves the right to disclose any electronic messages to law enforcement officials or third parties as may be required by law. The

The District may also block or filter other content lacking educational value or benefit or that poses a threat to the network, and will take measures to prohibit unauthorized disclosure, use, and dissemination of personally identifiable information regarding students. Students shall not use any website, application, or methods to bypass filtering of the network or perform any other unlawful activities. In addition to the District's use of filtering software, every user must take responsibility for his or her use of the network and Internet and avoid these sites. The Administration will educate minor students about appropriate online behavior, including interacting with other individuals on social networking websites and
